PROFESSIONAL SUMMARY

Full-Stack Developer and Computer Engineering student (CGPA 8.47/10, graduating 2027) skilled in Java, Python, and AI/ML-driven systems. Experienced in building scalable, production-grade features from scratch using Java Spring Boot, the MERN stack, and Python-based ML pipelines, including OCR, NLP-driven report analysis, and computer-vision (MediaPipe) integrations. Seeking a Trainee Software Engineer role to contribute to AI-driven SaaS product development while deepening expertise in scalable software engineering and applied AI/ML.

TECHNICAL SKILLS

- Languages: Java, Python, JavaScript (ES6+), TypeScript
- Frontend: React.js, HTML5, CSS3, Tailwind CSS
- Backend: Spring Boot, Spring MVC, Spring Security, JSP/Servlets, Node.js, REST APIs, Microservices
- AI/ML: Python-based OCR & NLP pipelines (Tesseract), AI-driven report/data analysis, ML-based computer vision (MediaPipe)
- Databases: MySQL, MongoDB (NoSQL)
- Auth & Security: JWT, Role-Based Access Control (RBAC), Session Management
- Tools & DevOps: Git, GitHub, Maven, Docker, Swagger/OpenAPI, JUnit, Apache Tomcat, VS Code, XAMPP

EXPERIENCE

Java Developer Trainee

Jun 2025 – Jul 2025

r3sys (r3sys.com)

Remote

- Built 5+ Java web applications from scratch (Spring MVC, JSP, Servlets) spanning CRUD dashboards and data-driven portals, writing efficient, reusable, and scalable code aligned with production best practices.
- Optimized RESTful endpoints and normalized JDBC/MySQL schemas via SQL refactoring, reducing API response times and improving maintainability of existing modules.
- Debugged runtime and performance bottlenecks through server log analysis, eliminating critical failure paths across multiple deployments in a remote agile workflow.

PROJECTS

Medical Emergency Response System (MERS) — Java, Spring Boot, Spring Security, Hibernate, MySQL, Python, Docker, REST APIs

- Built a role-based healthcare management system (Admin, Doctor, Patient, Ambulance) from scratch, implementing Spring Security RBAC authentication and RESTful/microservice-style APIs for emergency requests, appointments, and ambulance allocation.
- Developed an AI/ML-powered diagnostic report analysis module in Python, using OCR (Tesseract) and NLP techniques to automatically extract patient vitals from scanned medical reports and flag critical cases for faster triage — an AI-driven enhancement to the core Java platform.
- Integrated MySQL via Hibernate/JPA with optimized queries; containerized the application with Docker and documented REST endpoints with Swagger/OpenAPI, delivering real-time emergency tracking and prescription management through a responsive JSP/Bootstrap dashboard on Apache Tomcat.
- Authored unit and integration tests with JUnit and Mockito, using Maven for build automation to ensure reliability across critical, reusable emergency-response modules.

WebOn — AI-Powered AR Live Shopping Platform — Node.js, WebGL, MediaPipe (ML Pose Estimation), WebRTC, Socket.IO, Express

- Built a real-time, AI-powered e-commerce platform for virtual try-on during live seller video calls, using a machine-learning pose-estimation model (MediaPipe) to extract 33 body landmarks driving a WebGL 3D garment engine with per-vertex curvature shading and dual-pass arm occlusion.
- Implemented Socket.IO session management and WebRTC peer-to-peer video streaming for low-latency, scalable live interactions.

AgriConnect — Agricultural Services Management System — Java, Spring Boot, Hibernate, MySQL, JSP, REST APIs

- Built a multi-role agricultural platform (Farmers, Service Providers, Admins) from scratch with 15+ REST APIs, Spring Security + RBAC, complete CRUD operations, and responsive JSP dashboards.

ACHIEVEMENTS

- Selected for the Regional Qualifiers of Eureka! at IIT Bombay — Asia's largest business model competition — out of 25,000+ competing teams.

LEADERSHIP & IMPACT

Technical Team Head — E-Cell & E-Builders Club, RCPIT

2024 – Present

- Led technical operations for entrepreneurship events, developed a real-time quiz application supporting 100+ concurrent users, and organized web development workshops while mentoring 20+ students.

EDUCATION

B.E. Computer Engineering — CGPA: 8.47 / 10

2023 – 2027 (Expected)

R. C. Patel Institute of Technology, Shirpur

CERTIFICATIONS

- Mastering Java — Nextech Infosystems
- Python Programming — GUVI (Google for Education)
- Java Full Stack Developer — r3 Systems Private Limited
- Full Stack AI Engineer 2026 — Udemy
